Gold The Secret told of the origins of our precious metal has been used to. Download Full pdf file of Group Learning and 8th Edition: 2019.Q: How to remove Component from observableArray So, I'm a newby in js and angular. I have array of component, a list of components on html: And component: @Input() isSelected = false; Now, I want to filter list to have a list with only one of the components selected. Somehow this code does not work: component.selected = true; //component.ts this.component[component.selected].remove(); //component.component.ts this.components.filter(c => c.isSelected == component.selected); I use last two lines of code with component.component.ts has ngModel. All other components in the list have isSelected property and I want to remove one component from the list. I have components in this format and I'm new to js, so please forgive me if the question does not look logical and also, I'm trying to avoid "rethink" everything, I'm just trying to figure out how to do it. Edit: Adding stackblitz link: A: Your assignment of a component to true in the [isSelected
