This invention relates generally to a railroad car truck or support, and more specifically, to a railway car truck having a ballast bed with portions of the wheels resting in areas supported by and/or in communication with the railroad track bed. As described in U.S. Pat. No. 3,470,856 to Fischer, railway car trucks typically include a hollow metal frame supported by a truck frame, a wheel and axle assembly with a wheel in a top bearing cup supported on the frame, and a rubber-tired wheel base supporting the frame and extending rear
