I cant believe Im typing this; the developer of this game must be a deeply disturbed man. I honestly couldnt care less about the game and dont plan to download it no matter how many people tell me to. Gameplay: absolutely 100% unfunny... Actual gameplay: You start off in a small house, and your mother invites you out to play because she gets off work and your father left a month ago. Unfortunately for you, it turns out that your father has the wrong house. DANG! Great FMV graphics in 2D. Sound is pretty good. Fun game overall, but considering it is p.....is a classic remake of a classic game. Great FMV Game: I like the FMV part of this game, when the main character is going to school I think it is cool how they added the person on the computer screen also, as he acts all excited when you have to get back to school. Although the music in the background is annoying in my opinion, the whole game is a good one. Fun and Interactive: Now i know that this is not the newest game in the franchise, but I have to say i enjoy the different side to the story that this game has to offer. Now i know that this game has different levels in it, which even make the levels more interactive and take part of the storyline. The music is pretty well done, and the animations seem to be well made. I also like that the p.....is an RPG where you can fight battles and talk to other characters to get the info you need to get the mission over with. This is a very fun game and a must have for anyone interested. Great Graphics and Animation: The graphics and animations are great when they dont try to flashy and leave them for the people who dont like to flashy graphics, they all come together to make a great game in my opinion. The animations which come throughout the story are well done and brighten up the game and make it look really cool. Cool World: As a little kid i was addicted to watching Cool World and everyone thought that I was addicted to the weird cartoons. I remember watching Cool World a lot. I mean, who doesnt want to be in one of the characters in that and play the game like the coolness that they are. This game is a lot of fun to play. Awful Audio: This game is not even worth mentioning that they even made an audio file for it.

Story overview

On the eclipse day the king of a certain kingdom is performing a royal ceremony. A message comes that the evil prince is setting an ambush. What an unlucky kingdom!

But it is no ordinary day. The suns will shine only from twelve hours.

The king and queen of a certain kingdom are invited to the palace of an impious king. They are accompanied by three loyal guards and a bunch of maids. The palace is an exquisite palace and it has beautiful gardens.

The ceremony ends peacefully. A letter is received from the evil prince. The latter convinces the king and the queen to leave immediately and he would take care of the problem. The number of guards and servants increase and the palace is fortified.

But as the king is reading the letter, his guard puts on a cutlass and approaches the king.

This action raises alarms. The guards surrounding the king and queen grab them and take them to their rooms. The king is even afraid to leave his room!

The king is imprisoned in his locked room. The queen also is imprisoned. The guards leave. Meanwhile, the

evil prince-to-be, who has got the letter, convenes a meeting, sends out the letters of his seal and sets up a meeting place for his special guests! When the king and his wife are taken to a room, they see a huge door. Their friends are on their way.
